Sizing shuffle partitions for a 100 GB shuffle
too few partitions -- each task spills
too many partitions -- scheduling overhead
target: 128-200 MB per task
100 GB shuffle: MB/task = 102400/partitions
default 200 partitions
-> 512 MB/task (spills)
~512-800 partitions
for this shuffle size
shuffle-read size per task (MB)
